## The Premier Conference on Earned Value Management

The IPM Conference is your chance to learn about project performance techniques, including Earned Value Management (EVM).

The conference provides training, current topics from practicing professionals, access to world leaders in project performance management, networking and the latest in software and consulting.

### Training

Our training program provides opportunities to improve basic and intermediate integrated program management knowledge and abilities. Key to our program is gaining a solid foundation in the principles of EVM and a thorough understanding of EVM data analysis techniques.

### Practice Symposia

Practice symposia discuss lessons learned and best practices on implementing EVM, updates on recent developments, and integrating project performance management with other management techniques.

### Workshops

Workshops are forums to introduce and develop new and emerging practices and techniques to improve program management using project performance management. Objectives are to identify potential solutions.

### Tools & Services

Tools Track covers the range of commercially available, world-class, performance management tools from earned value tracking to scheduling to reporting. Attendees will see the latest offerings from vendors and hear first-hand how these tools are effectively being used to manage today's most complex programs.
